P. Adhiguru

NATIONAL CENTRE FOR AGRICULTURAL ECONOMICS AND POLICY RESEARCH
NCAP’s

Mandate:

- Policy oriented research on
  (a) technology generation, diffusion and impact,
  (b) sustainable agricultural production systems,
  (c) interaction between technology and other policy instruments like incentives, investments, institutions, trade, etc.
- Strengthen agricultural economics and policy research and teaching capability in state agricultural universities and ICAR deemed universities
- Enhance ICAR participation in agricultural policy decisions.

Vision: Efficient, sustainable and equitable agriculture and rural development

Mission: Promote science led agricultural growth and development with the motto that even the best can be improved

Goals: Articulate the relevance of Agricultural Economics and Policy research inputs in planning and enhancing its uptake by various stakeholders

Objectives: Evaluate policy options for efficient, sustainable and equitable agriculture and rural development

To serve as Centre of excellence in agricultural economics and policy research and teaching/training

Strategies: Design and implement agriculture policy research, training and policy interfacing programs focusing on

- Technology Policy
- Markets and Trade
- Sustainable Agriculture Systems
- Institutional Change and
- Agricultural Growth and Modeling

National Centre for Agricultural Economics and Policy Research (NCAP) has been established by the Indian Council of Agricultural Research (ICAR) with a view to upgrading agricultural economics research through integration of economic input in planning, designing, and evaluation of agricultural research programs and strengthening the competence in agricultural policy analysis within the Council. The Centre is assigned a leadership role in this area not only for various ICAR Institutes but also for the State Agricultural Universities. With a view to making agricultural research a more effective instrument for agricultural and rural change and strengthening the policy making and planning machinery, the Centre undertakes and sponsors research in agricultural economics relating to the problems of regional and national importance.
